

Easy Traffic

Arteco Easy Traffic is a powerful software solution that can handle license plate reading cameras for traffic monitoring, which can provide real-time traffic data and supporting activities Law Enforcement.

Did you know that the city surveillance can become one with the traffic control?

Easy Traffic comes with Arteco NEXT in the same package, the VMS which allows integration of more than 5,000 camera models from over 200 manufacturers, in addition to various software systems, hardware devices and sensors. You will have a single system, always updated and easy to use for the search of events and video evidence.

How do I manage the system? Can I do it on my smartphone or tablet?

Absolutely yes! Arteco Easy Traffic works on mobile devices, as well as in Arteco NEXT.

What kind of cameras should be installed? Changes are needed to the city lighting system?

Easy Traffic works with devices specifically designed for traffic control and is completely made in Italy. The normal "consumer" type cameras are not able to be used. Please contact us for a list of supported camera brands and models. A further benefit: in 90% of cases you can take advantage of the existing infrastructure, such as public lighting, traffic lights or overpasses.

Can I control and manage parking areas or access control systems?

Arteco Easy Traffic is expandable and offers a module for the automatic management of parking lots, as well as a module for connecting to traditional access control systems.

What are the available smart functions?

In addition to those mentioned above, we can add: vehicle counting, detection of vehicles carrying dangerous goods (depends on the LPR camera model), and many others.

Are there are other features in addition to those mentioned?

You can combine context cameras equipped with on-board intelligence, and use additional video analysis software modules to detect vehicles parked in prohibited areas, objects/obstacles on the roadway and vehicles travelling the wrong way.

What are the benefits of Arteco Easy Traffic compared to mobile systems?

The comparison is simple and fundamental. Arteco Easy Traffic is an application that works 24/7, 365 days a year, without the need to have vehicles and men on the road which may instead be used for other types of activities.

Can I share expenses and use of my system with other law enforcement agencies?

Arteco Easy Traffic can be shared using simple dedicated optional modules, so each agency can have its own control panel.

Are there charges for upgrades?

The starter pack includes updates for 2 years, and it's possible to secure a plan for up to 10 years of upgrades.

Is there a technical and design support? Is it difficult to install?

In the design phase, as well as in the pre and post sales stages we will support you in every process. On a technical level the configuration is simple: a short, simple video guide will walk you step by step through the installation and the first use. You will immediately be fully autonomous.

Is there a way to test this?

Just one call and you can try Arteco Easy Traffic immediately on your PC!

It's simple, it's EASY TRAFFIC, and now you can have it!
