

ACC420

The ACC420 is a Secure Relay installed on the secure side of the door to combat tampering and maintaining Access Control integrity

- Access Control
- Utilising 26bit Wiegand Communication the Secure Relay makes Access Control integrity a breeze
- Available in Custom versions to:
 - Arm / Disarm Alarm System
 - Trigger Emergency systems
 - Lift Control

The **ACC420** Secure Relay is used to enhance the level of protection for an Access Control installation. On a typical Access Control installation the Biometric Terminal's on-board relay is used to trigger the lock and this exposes the installation to intrusion and tampering.

With the Secure Relay installed on the secure side of the access point the Biometric Terminal interfaces via the Wiegand output to the Secure Relay thereby triggering the lock via data stream. In the event the Biometric Terminal is tampered with the installation remains secure

Features:

- Wiegand 26bit Interface
- Door Override Interface
- 10 Amp Relay NO / NC
- Adjustable Timer Circuit
- 25mA Operating Current
- Relay Status LED
- Power Status LED
- Requires 12V
- (L) 75 x (W) 43 x (H) 25 mm
- Available in 7 variants. Please enquire from ViRDI Distribution SA (Pty) Ltd.
