

NW139/ NW139-2 – PoE Extender/ Splitter

Picture the scene, the customer requires an additional camera, gate station, access control reader or Wi-Fi access point but there is no spare port on the nearest switch and cabling needs to be run, what to do?

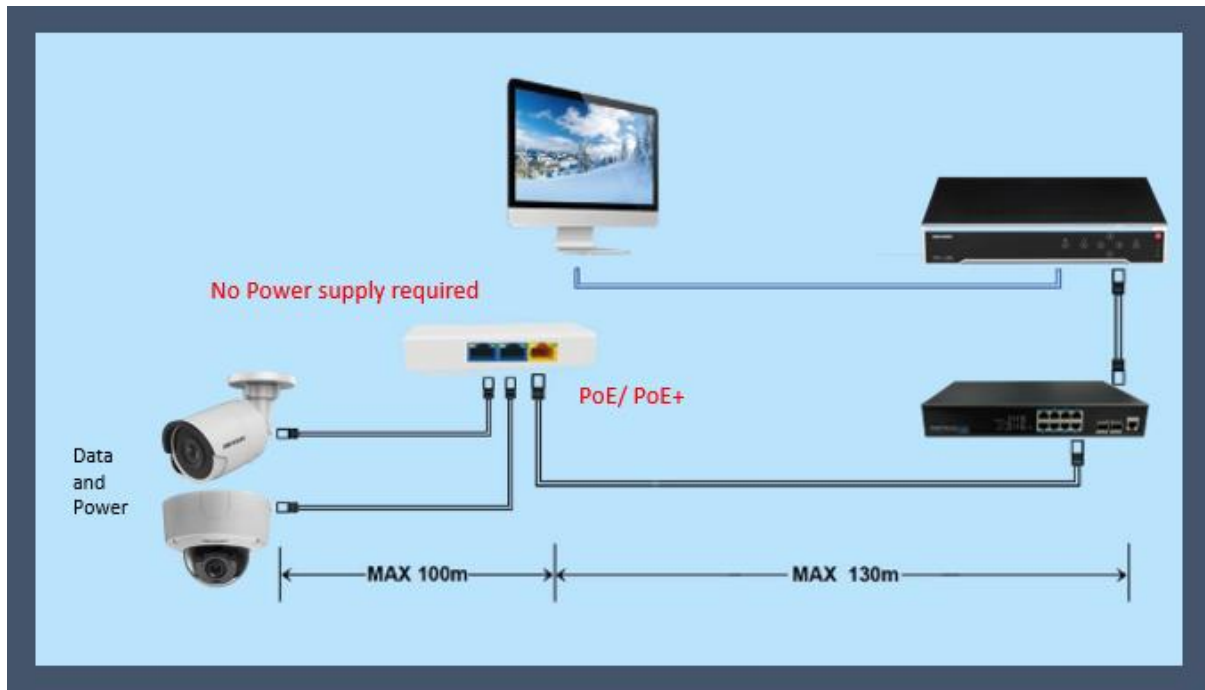

NW139

NW139-2 (Weatherproof Housing)

The **NW139** or **NW139-2** allows you to connect 2 devices to a single PoE port on a switch up to 230m away, saving you the need to upgrade the switch and even more importantly, save you time and money

Application

Product Specifications
