

NW276-4 (16 Channel IP Split Screen Decoder)

What if I told you.....

That you could view multiple ONVIF compliant IP cameras on a single screen without the need for a dedicated NVR, workstation or VMS platform,

You could do this on your existing network,

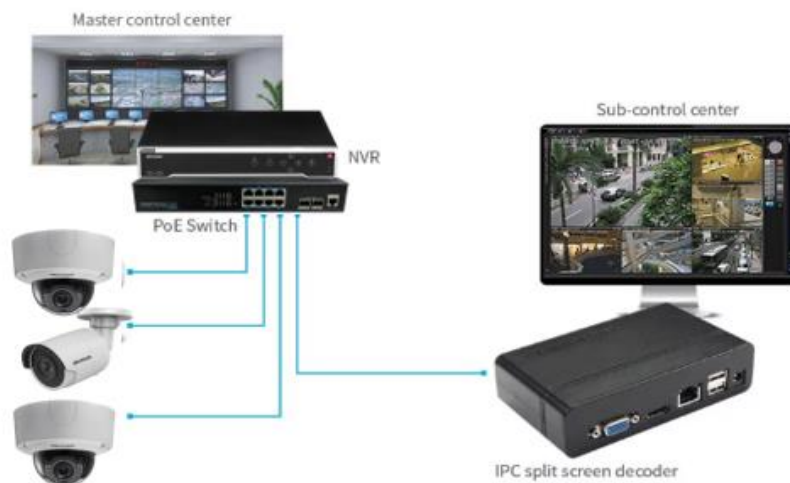

You could do this wirelessly,

That you could pick and choose which IP cameras to display,

And that you could do this securely.

Well you can

Introducing the **NW276-4**, a 16 channel Video and Audio IP Split Screen Decoder available from a Regal branch near you

Product Overview

Simply add a network cable from your existing network, plug in your HDMI or VGA monitor, add the wired USB mouse and then power the unit up.

You are now ready to begin configuration

Assign an IP address to the unit (Must be on the same range as the cameras)

Now add the cameras you want to view by selecting the Channel, IP address, ONVIF protocol, Username and Address

Change the default username and password to secure the unit and you are good to go

Easily navigate and select channels via the on screen menu options.

- Supports DHCP, FTP, DNS, DDNS, NTP, UPNP, EMAIL, IP SEARCH and ALARMING CENTER for Alerts and Remote Viewing
- Power Supply and Monitor Cables not included
